# ... why ...

In the 1960 experts say, drugs were popular because society was changing very fast. And today? Aren't musicians and movie stars using drugs today; and influencing teenagers? Certainly, these early years of the 21st century are a time of change, too. Parents often complain that their children drink, but it is true that many of the young people are introduced to alcohol at home. Some parents think there's nothing wrong with drinking 5 or 6 beers or getting drunk. A lot of abusers have alcoholic parents. That's where many of the problems start. Nowadays young people have more money. Some of them are given money by their parents and the others take some temporary<sup>1</sup> job. Young people cannot imagine the entertainment, discotheque without alcohol. Press, cinema and TV advertisements give the impression that people who drink are successful, make friends easily and enjoy themselves. Many young people aren't interested in anything. They are bored and so they drink alcohol and even use drugs. Some teenagers claim that there is not a lot of to do except drinking. For many unemployed<sup>2</sup> people drinking is a form of escapism. One must be aware of the fact that many problems are not caused by those who are dependent or addicted but by those who are occasional users. We have many problems with legal drugs as tobacco and alcohol.

There are also young men who aren't the real drunkards but who drink excessively from time to time and it's very dangerous.

Drinkers become depressed. After drinking they suffer from sickness and headache. Heavy drinkers do damage to themselves and other people. Alcohol can make them aggressive. It can upset their coordination and impair their judgement. Alcohol is very dangerous<sup>3</sup> for drivers.

The big problems of each society are drugs. It is dangerous for the young people even for children. The drugs can be smoked, injected, sniffed, inhaled through the nose. The well-known drugs are marijuana, heroin, cocaine, LSD, pervitin. Marijuana is made from dried leaves and flowering tops of marijuana plant. It is smoked in cigarettes form and in various pipes. The smokers have red-eyes, they look like drunkards<sup>4</sup>, they laugh excessively or they are in a state of apathy. Heroin is the most dangerous and addictive narcotic. It is made from opium poppies. It can be injected, inhaled through the nose or smoked. There are also heroin users who died after the first dose of heroin. This drug can cause coma or death. LSD is a powerful hallucinogen. A drop of LSD can be put on anything that can be swallowed.

Cocaine comes from the leaves of the coca plant. It is extremely addictive drug and addiction can begin after first dose. It produces a pleasant body sensation and this effect lasts about 30 minutes that later changes into anxiety, headaches, and hallucinations. Continued using can lead to depressions, suicide and death. Cocaine can be sniffed or injected into the bloodstream. So why would anyone want to try such drugs? The answers are similar to reasons given for drug use in the 1960s. Because my friends use them, because it's just for fun when we go out dancing, because other people can become addicted, but no time, because I'm young and I want to try everything once. Why should one not use drugs? It is not worth our life! Even the first dose can kill us. The effects can sometimes lead to a state of relaxation or happiness that are not natural and is life threatening. My principal message to all people is "Stay clean! Stay drugs-free!"

All of us failed to match our dreams of perfection. So I rate us on the basis of our splendid failure to do the impossible.

*(Marsha Norman)*

Dreams have only one owner at a time. That's why dreamers are lonely.
